

Inequality Chart

The inequality chart helps you discover the position of specific target groups with regard to socio-economic and socio-demographic characteristics. By filling out the chart, differences between individual groups as well as between the project team and individual target groups become apparent. Based on this analysis, disadvantages, but also opportunities and resources of each target group are recorded in the following table. For instructions, see „Work sheet Social Inequality and Health" on pages 8-10.

Legend:

Colours for...

Project team:

target group 1:

target group 2:

target group 3:

Problems and opportunities of target groups in relation to the project objectives and based on the results of the inequality chart.
